58-Meter Truck-Mounted Concrete Boom Pump

- 188'1" ft Vertical Reach
- 4-Section Roll and Fold Boom Design
- 5" Delivery Line - All Sections
- Standard Auto Lubrication System
- Up to 260 yd³/hr Max Concrete Output
- Free Flow Hydraulics

**Boom**  The Putzmeister 58-Meter is the largest truck-mounted boom pump in the 50M class. Attaining 188'1" heights, this impressive unit features a 4-section roll-and-fold boom made of the highest quality, fine-grained steel in a box-type design for enhanced stability.

**Delivery Line**  The boom is equipped with a 5 in induction hardened delivery line mounted in easy lift-out brackets for simple delivery line replacement. Standardized elbows and straight pipe sections are used for common component availability and easy replacement.

**Pedestal**  The fully integrated pedestal design of the Putzmeister 58M absorbs all forces as outriggers and boom are within one structural element. This design results in less twist, reduced forces transferred to the truck frame, a small outrigger footprint, low overall weight and quick setup. The boom pedestal includes a rotation bearing and access openings to simplify changing the turret pipe. Triple suction filters with indicator gauges are located outside of the pedestal for easy access, and a condensation trap is found in the tank to collect water. Two spacious decks allow convenient storage of pipe and hoses. Conveniently mounted tool boxes also create additional storage space.

**Clean Out**  A 406 psi (28 bar) hydraulically-driven water pump with a 160 gallon (600L) water tank in one of the outrigger legs make clean out easy.

**Outriggers**  All outrigger functions are fully hydraulic with integral cylinders. Front outriggers swing out 45 degrees, telescope and extend down, while the rear outriggers swing out and extend down. This unique design allows for quick set up on confined jobsites. For extended on-site use, a diesel fuel tank is built into one of the rear outrigger legs and holds up to 155 gallons (590L). Aluminum outrigger pads (4) with two side compartments are included with each unit.

**Radio Remote Controls**  The pump comes standard with an HBC radio remote control featuring fully proportional boom speed control for smooth and precise positioning of the boom at greater distances. This is an extremely important feature on larger sized models since at their extreme reach, even a small amount of movement can result in a faster moving boom at the end hose.

**Concrete Pump**  With the same setup, only Putzmeister has the technology to offer both 260 yd³/hr output and provide 1233 psi concrete pressure with its .20H pump on the piston side (or 210 yd³/hr output and 1233 psi with its .16H pump – rod side). With competitive designs, you have to decide if you want either high pressure or high volume. Key features include a free flow hydraulic system for smooth controllable pumping, as well as, hard-chromed concrete cylinders and automatic lubrication of the concrete pistons for long service life. This pump has a fully adjustable volume control which allows very slow pumping while retaining full concrete pressure and boom speed.

**S-Valve**  Ideal for high pressure applications, our hard faced S-Valve with gradual 8 in to 7 in (200 to 180mm) reduction is designed to handle extremely harsh concrete mixes. A thick-walled valve construction, exclusive Putzmeister hard-chromed concrete cylinders and multi-piece piston cup design provide longer lasting wear overall.

**Hopper**  With a large 19.4 cu ft (550L) capacity, this EZ Clean Out RS 905A hopper features a remixer, vibrator and splash guards as standard. A low 51 in (1295mm) hopper height allows easy discharging from a mixer truck.

4-Section Boom

1st section articulation: 175˚
2nd section articulation: 180˚
3rd section articulation: 180˚
4th section articulation: 210˚

General Specifications

Pipeline size (ID) metric ends with couplings (133x4mm)+ 5” (125mm)

Rotation: 365˚

End hose-length (heavy duty): 10’ (3m)

End hose-diameter: 5” (125mm)

Outrigger spread L-R–front: 35’2” (10.72m)
Outrigger spread L-R–rear: 34’3” (10.43m)

Pump Specifications

**58.16H**

Output-rod side: 210 yd³/hr (160m³/hr)
piston side: 146 yd³/hr (112m³/hr)

Pressure-rod side: 1233 psi (85 bar)
piston side: 1885 psi (130 bar)

Concrete cylinder dia.: 9” (230mm)
Stroke length: 83” (2100mm)

Max strokes per minute:
rod side: 31
piston side: 21

Volume control: 0-Full

Vibrator: Standard

Hard-chromed concrete cylinders: Standard

Hydraulic system: Free Flow

Hyd. system pressure: 5075 psi (350 bar)
Differential cylinder dia.: 5.5” (140mm)
Rod diameter: 3.1” (80mm)
Maximum size aggr.: 2.5” (63mm)

Water tank: 160 gal (600L)

**58.20H**

Output-rod side: 260 yd³/hr (200m³/hr)
piston side: 260 yd³/hr (200m³/hr)

Pressure-rod side: 1233 psi (85 bar)
piston side: 1233 psi (85 bar)

Concrete cylinder dia.: 11” (280mm)
Stroke length: 83” (2100mm)

Max strokes per minute:
rod side: 27
piston side: 21

Volume control: 0-Full

Vibrator: Standard

Hard-chromed concrete cylinders: Standard

Hydraulic system: Free Flow

Hyd. system pressure: 5075 psi (350 bar)
Differential cylinder dia.: 5.5” (140mm)
Rod diameter: 3.1” (80mm)
Maximum size aggr.: 2.5” (63mm)

Water tank: 160 gal (600L)

Maximum theoretical values listed.
* Applies to units mounted on PMA stock truck-MACK MR 688S
+ Standard delivery line system rated at max line pressure of 1233 psi (85 bar)
  Only delivery line 133x4 mm is to be used on the 58 meter boom

End hose not to be operated in caution area.
